

TrustSphere

# Corporate Profile

## Reputation. Authentication. Online Trust.

TrustSphere is an innovative technology and data solutions provider with a vision to enhance trust across the messaging ecosystem. Their solutions combine key components of reputation and authentication technologies to build a 'sphere of trust' around today's communication infrastructure.

TrustSphere's mission is to restore trust and integrity in email communications and to revive confidence in the critical business processes which rely on email. TrustSphere was founded in 2006 as BoxSentry to address the challenge posed by conventional email filtering technologies often misclassifying and blocking legitimate one-to-one email as spam (false positives). TrustSphere is headquartered in Singapore with operations and clients worldwide.

## Strength in Innovation

TrustSphere's award winning technologies are redefining the agenda for email security and deliverability by effectively creating a new category: email integrity.

LogiQ™ is an email integrity engine that works in conjunction with existing email filtering solutions to virtually eliminate "false positives" for enterprises and government.

TrustCloud is the world's largest positive reputation service providing realtime rating of authenticated sender domains to assist in filtering incoming email messages.

RealMail™ is a true multi-tenant, cloud ready email security platform designed for managed security service providers.

TrustSphere (formerly known as BoxSentry) was named to Red Herring's Global 100 in 2008, cited by ZDNet Asia as TechnoVisionaries in December 2008 and won the merit award in Asia Pacific ICT Awards (APICTA) in 2008 and 2009.

The company has several patents pending for its solutions set. Furthermore, the Singapore government has awarded TrustSphere (formerly known as BoxSentry) an R&D grant to explore next generation online reputation services for a IPv6 centric networked world.

## Partnerships Around the World

TrustSphere collaborates with its network of Specialists, System Integrators, Resellers and Solution Partners worldwide.

## Industry Involvement

As part of its commitment to leadership in the email integrity space, TrustSphere is an active contributor to various industry alliances including OTA (Online Trust Alliance), MAAWG (Messaging Anti-Abuse Working Group) and SITF (Singapore Infocomm Trade Federation).

TrustSphere's team members have been responsible for significant thought leadership in the email security space including having authored leading authentication standards.
